

**CLAMPING DEVICE FOR LOADING OF THE TUBES ON FILLING AND  
ON SEALING WITH 24-25-30 STEPS**

## **PLIERS FOR LOADING TUBES DURING FILLING AND PLUGGING WITH 24-25-30 TUBES**

It is an equipment with a very light structure for grasping the bundle of tubes to be inserted in the filling machine and for unloading them upon termination of the filling procedure inserting them in the automatic plugging device and afterwards unloading them again.

It can be supplied with the version with manual closure as well as pneumatic one.

Furthermore, it can be equipped with a hook and hung onto a balancer for easing handling operations when unloading very long and heavy resistances .

All the models are constructed with a distance between the centres of 19.05 mm for 25-30 tubes and 24 tubes with a distance between the centres equal to 13 mm.

### **GENERAL TECHNICAL SPECIFICATIONS:**

Weight	Kg.	3.5
Dimensions	mm	700x160x60
